Experience:

<u>Freelance Developer</u>
The Mangano Collective LLC   (September 2017 - current)
Web development and digital marketing agency.

<u>Software Engineer (Web Frontend)</u>
International Lottery & Totalizator Systems, Inc. | San Diego, CA   (March 2016 - August 2017)
A leading supplier of online wagering and digital scan voting systems with installations worldwide.
- Contributed to the design, development, testing, documentation and general maintenance of the company's lottery software products (both existing and greenfield projects).
- Practiced Agile and Scrum with 1.5 - 2 week sprints.
- Converted designs into working applications based on requirement specifications, system/equipment limitations, and established coding standards.
- Reviewed product and project requirements, providing technical input on product definition and project plans.
- Created and maintained software documentation (functional and design specs).
- Performed debugging of programs and routines; conducted unit-tests; assisted with final system integration testing, software QA testing, and customer acceptance testing.
- Misc: Created C# console apps for internal use and completed minor tasks on Java Backend.

Technologies: HTML | CSS | JavaScript (AngularJS , Angular 2) | Karma/Jasmine | Grunt | Bootstrap

<u>Student</u>
Origin Academy | San Diego, CA   (September 2015 - December 2015)
 A 12-week intensive coding bootcamp based out of San Diego, California covering technologies like HTML/CSS, JavaScript, .NET, SQL, MySql, Git, and more.

Current Skills:

<u>HTML/CSS</u>: Responsive designs utilizing CSS flexbox layout and previously the bootstrap library.
<u>JavaScript</u>:   Specializing in consuming data from API's and DOM manipulation with AngularJs 1.5, and more recently Angular 2/Angular 4 with TypeScript 2.
<u>C# .NET</u>:   Exposure to C# and the .NET Framework - currently training to expand this knowledge.
<u>Misc</u>:   Karma/Jasmine, Grunt & Gulp, Angular CLI, Git, Agile/Scrum

Recent Projects:

<u>A4 Garage</u>: Full featured web app written with Angular 4 & Typescript 2. Users of the app can create, read, update, and delete data through multiple clean interfaces and wizards.

<u>Chatbot</u>: Messaging app integrates with the Cleverbot API, allowing users to converse in real time.

<u>TheManganoCollective.com</u>: Website and client portal utilizing JS, Angular 1.5, and bootstrap.

<u>AnthonyMangano.com</u>: Online portal which hosts personal projects, and links to others. This site relies heavily on flexbox for the unique UI/design, and was also written with Angular & TypeScript.

(All projects available through personal site)
